

How to get the most from Online Learning

Make sure that you have reliable internet access

Technology glitches happen all the time. To avoid mishaps, ensure that you only leave necessary programs open whilst participating in Zoom session and save anything you are working on repeatedly.

Ask for help when you need it

By asking your facilitator to clarify content, you will also help them not only to evaluate learners' level of understanding, but this will also help the facilitator to get an idea of the overall effectiveness of the online sessions. Your feedback and comments are important to us.

Participate in online discussions

Online learning doesn't necessarily mean learning in isolation. Connecting with the facilitator and other participants will enhance your experience tremendously.

Please ensure that you are mindful of your tone; be respectful when you disagree with others, and always write in clear sentences in the chat box to avoid misunderstandings.

Stay on schedule

Ensure to engage with all elements of the learning, including the Online Learning Platform. You will find lots of information, resources and useful materials on there. Check this out before you join us for the online sessions.

If you are having difficulties submitting any of the work or your assignments on time, contact the facilitator and let them know, so they can help you succeed.
